

ENZYME SUBSTRATE DELIVERY AND PRODUCT REGISTRATION IN ONE STEP ENZYME IMMUNOASSAYS

Abstract of the Disclosure

5 One-step enzyme immunoassays in which enzyme-antibody conjugate or label
and enzyme substrate are separated until separation of bound and free enzyme
conjugate or label is complete. This separation is accomplished by using variable flow
paths, immobilization of substrate at the test line, placement of substrate in a sac or
association with a particle label, enzyme product chemical capture, delay zone
dissolution and protected enzyme substrates.
